Software Development Specialist

WWW: [Bold Profile](#)

Summary

Proactive software development professional with over 6 years of experience in automation and AI-driven solutions. Recognized for excellence in problem-solving, mentoring, and delivering scalable, efficient solutions across Python, Java, C++, SQL, and cloud platforms, with specialized expertise in banking APIs and vulnerability management

Skills

- **Languages:** Python, C++, Java
- **Frameworks & Libraries:** Flask, Django, Numpy, pandas, scikit-learn, Tkinter
- **Tools & Technologies:** REST/SOAP APIs Postman, AWS, Azure, Docker, ServiceNow
- **Operating Systems:** Unix, Linux, Windows

Education

Master of Technology

COEP Technological University
Pune, Maharashtra, India
05/2018
GPA: 8.5

Bachelor of Engineering - BE

Yashwantrao Chavan College of Engineering - YCCE
Nagpur, Maharashtra, India
05/2016
GPA: 8

Certifications

- **Machine Learning A-Z - Udemy,** October 2024

Experience

LTIMindtree

Specialist | Bangalore, India 12/2023 to Current

On assignment for the International Monetary Fund (IMF).

- **Developed Machine Learning Model for Vulnerability Detection:** Created a machine learning model leveraging Qualys and ServiceNow APIs to detect and prioritize vulnerabilities automatically, reducing manual review time by 50%, and enhancing security response efficiency. *Tech Stack: Python, Machine Learning, Qualys API, ServiceNow API.*
- **Optimized Vulnerability Management Engine Performance:** Identified and resolved key bugs within the Vulnerability Management engine, leading to a 60% improvement in system performance and a more secure, reliable platform. *Tech Stack: Python, Django, SQL.*
- **Provided expert technical support:** Collaborated effectively with cross-functional teams to troubleshoot and resolve complex technical issues, ensuring seamless client operations and strengthening customer satisfaction.
- **Mentored junior developers:** Guided new team members on API functionality and deployment processes, enhancing team productivity and knowledge-sharing culture.

Impact: Enhanced security workflows, improved software reliability, and contributed to a collaborative team environment by providing technical leadership and mentorship.

EdgeVerve

Senior System Engineer - Product Development | Pune, India 08/2021 to 11/2023

- **Developed an Automated File Detection Tool:** Created a tool that automates the identification of all relevant files for feature changes, reducing requirement analysis and code review time by 80%, significantly accelerating the development lifecycle. *Tech Stack: Java, Python, Shell Scripting*
- **Resolved API Defects and Improved Stability:** Fixed over 32 critical defects in the Finacle's Limits and Collaterals APIs, enhancing product reliability and customer satisfaction. *Tech Stack: Docker, C++, Java, SQL*
- **Led Delivery of 30+ Finacle APIs:** Delivered and optimized APIs for Finacle, gaining expertise in banking API design and troubleshooting, contributing to streamlined financial processes. *Tech Stack: Java, Python, Postman, Excel*

Impact: Accelerated development processes, reduced manual workload, and significantly improved system reliability and customer experience.

- **Vulnerability Management Foundation** - Qualys, June 2024
- **Data Structures & Algorithms in Python** - Udemy, January 2023
- **Oracle SQL Certification** - Udemy, March 2022

Infosys

Senior System Engineer | Pune, India 08/2018 to 08/2021

- **Enhanced Code Quality by Resolving 100+ Coverity Issues:** Systematically identified and fixed over 100 Coverity issues in backend code, significantly improving code quality and maintainability.
Tech Stack: Java, Python, Coverity
- **Developed Business Requirement Automation Tool:** Designed an automation tool to extract business requirements from Excel sheets, automatically generating API data files, reducing manual preparation time by 80% and minimizing errors.
Tech Stack: Python, Excel
- **Designed and Deployed SOAP and REST APIs:** Built robust SOAP and REST APIs for Finacle's Payments, Trade Finance, and Bill Pay Modules, enabling seamless integration for financial processes and enhancing user experience.
Tech Stack: Java, Python, XML, Finacle

Impact: Improved product efficiency, reduced manual errors, and enabled smoother operations for Finacle's banking modules.

Tata Motors

Research Intern | Pimpri-Chinchwad, India 08/2017 to 07/2018

- Developed an Induction Motor Fault Model to simulate stator and rotor faults, aiding fault diagnosis and preventative maintenance for enhanced motor reliability. Tools: MATLAB, Simulink, Ansys. *Tech Stack:* MATLAB, Simulink, Ansys.

Awards

- **"Problem Solver" Award - LTIMindtree (2024):** Recognized for outstanding contributions to vulnerability management solutions.
- **"Rookie of the Team" Award - Infosys Finacle, (2021):** Awarded for quick adaptation and impactful contributions in a new role.
