Bangalore / Nagpur, India

[LinkedIn Profile](#)

AI/ML FRAMEWORKS

- TensorFlow / PyTorch
- scikit-learn
- Hugging Face Transformers
- Amazon SageMaker
- MLflow

LLM & GENAI

- Generative AI / LLM Integration
- Prompt Engineering
- RAG Pipelines
- LangChain
- OpenAI / Anthropic APIs

NLP

- Text Classification & NER
- Document Parsing
- Embedding Models
- AI-Powered Automation

MLOPS & CLOUD

- Docker / Kubernetes
- Jenkins / Azure DevOps
- AWS (SageMaker, EC2, S3)
- Azure / Terraform
- Model Versioning & Monitoring

LANGUAGES

- Python (primary)
- SQL / pandas / NumPy
- Java / C++

EDUCATION

M.Tech

COEP Technological Univ.
Pune | 2018 | GPA: 8.5

B.E. Engineering

YCCE, Nagpur
2016 | GPA: 8.0

PROFESSIONAL SUMMARY

Software engineer with 8 years of experience, including 5+ years specializing in AI/ML, machine learning, and automation. Hands-on expertise in LLM-powered applications, NLP pipelines, MLOps, and predictive modeling. Proven track record of delivering ML solutions from prototype to production — including automated vulnerability detection, NLP-based document automation, and CI/CD-integrated model deployment. Proficient in Python, TensorFlow, PyTorch, scikit-learn, SageMaker, LangChain, and cloud-native ML infrastructure (AWS, Docker, Kubernetes).

PROFESSIONAL EXPERIENCE

LTM – (LTIMindtree - Larsen & Toubro Group)

Specialist

Dec 2023 – Present | Bangalore

Client: International Monetary Fund (IMF)

- **ML Vulnerability Detection:** Designed and deployed an end-to-end ML-based vulnerability detection system leveraging Qualys and ServiceNow APIs, reducing manual security review effort by 80%.
- **Model Optimization:** Optimized ML model performance by 60% through advanced feature engineering, hyperparameter tuning, and pipeline refactoring.
- **MLOps & CI/CD:** Implemented scalable MLOps pipelines with CI/CD automation using Docker, Jenkins, and Kubernetes — reducing deployment time by 70%.
- **NLP Automation:** Developed NLP-based automation pipelines for vulnerability report parsing, classification, and risk scoring using text processing and embedding techniques.
- **Team Leadership:** Led and mentored a team of 3 engineers on ML system design, API development, and model governance best practices.

EdgeVerve Systems (Infosys Finacle)

Senior System Engineer – Product Development

Aug 2021 – Nov 2023 | Pune

- **AI File Detection Tool:** Built an AI-powered document classification system using NLP techniques, reducing requirement analysis cycle time by 80%.
- **ML Inference API:** Designed and deployed scalable REST APIs for ML inference on AWS, integrating predictive models into production financial systems.
- **API Quality:** Resolved 30+ critical API defects, improving system stability, performance, and security across Finacle core banking modules.

Infosys

Senior System Engineer

Aug 2018 – Aug 2021 | Pune

- **NLP Business Automation:** Developed a Python NLP pipeline for automated requirement extraction from unstructured documents, reducing manual effort by 80%.
- **Scalable API Design:** Designed and deployed high-performance REST and SOAP APIs for Finacle banking systems, enhancing transaction processing efficiency.

Tata Motors

Research Intern

Aug 2017 – Jul 2018 | Pimpri-Chinchwad

- **Predictive Maintenance:** Developed induction motor fault prediction model using MATLAB, Simulink, and Ansys — foundational experience in time-series analysis and predictive modeling.

CERTIFICATIONS

- **AWS Machine Learning Engineer – Associate (2026)**
- Machine Learning A-Z – Udemy (2024)
- NPTEL Machine Learning – Elite
- DSA in Python – Udemy

AWARDS & RECOGNITION

- **"Shouting Star", "Best Engineer" & "Problem Solver"** Awards – LTIMindtree (2024 & 2025): Recognized for outstanding contributions to vulnerability management solutions.
- **"Rookie of the Team"** Award – Infosys Finacle (2021): Awarded for rapid adaptation and impactful early contributions.
